2. Please replace the paragraph beginning at line 12 page 29 with the following amended paragraph:

FIGURE 11 illustrates the operation of text indexing server [[115]] 101c, which may be used to integrate queries from both text database 101b and another database 111 that stores information about prospective customers. For example, database 111 might be any one of the databases 26, 41b, 61b, or 81b of FIGURES 2, 4, 6, or 8. Server [[115]] 101c accepts query parameters from the client, which may specify both contact parameters and keywords for searching database 111 and database 101b, respectively. The search results are then targeted toward a particular category of prospects. FIGURE 11 also illustrates how server [[115]] 101c may be used to store, identify, and reuse queries. The queries for a particular client may be stored in user profiles database 26.
